About Me

Computer Engineering student motivated by building solutions that help people and provide real value. I enjoy collaborating in teams and I am constantly looking for opportunities to improve and make an impact. You can find me at technology events discovering the latest industry trends or working in teams at hackathons.

Education

- Sep 2023 – **Bachelor's Degree in Computer Engineering, University of Santiago de Compostela**
Present - Treasurer of the Student Representation, actively involved in institutional and academic decision-making.
- Organized the first Capture The Flag (CTF) competition in my university.
- Participant in the university tutoring program, mentoring first-year students.
- Sep 2021 – **Science Baccalaureate, IES Eduardo Blanco Amor**
Jun 2023 - Awarded the Extraordinary Baccalaureate Prize and recognized among the Best Academic Records of Galicia.
- STEMbach program: developed a Python project on fractals in collaboration with the University of Vigo.

Highlighted Projects

- Apr 2026 **Gist, HackUPC 2026 — Bending Spoons Challenge**
JetBrains plugin to reduce developer context-switching cost: dynamically manages Slack messages based on real-time coding activity and generates AI-powered commit summaries to help developers catch up instantly.
- Built a Kotlin plugin in 36 hours, integrating Slack API, Git4Idea and OpenAI.
Technologies: Kotlin, JetBrains SDK, Slack API, OpenAI API, Git4Idea. **GitHub:** [sabelaperez/Gist](#)
- Dec 2025 **Roomsy**
Full-stack web application to manage tasks and responsibilities in shared apartments.
- Developed a full application using an REST API with Spring Boot.
- Led the frontend development, creating a simple and intuitive interface that consumes the API.
Technologies: Java, Spring Boot, Docker, React, Tailwind. **GitHub:** [sabelaperez/Roomsy](#)
- Mar 2025 **GreenDots, Finalist at Impacathon 2025 & EIXE 2025**
Android app to discover and rate sustainable businesses by their contribution to the SDGs.
- Responsible for the mobile application, including UI design and navigation.
- Presented the project alongside my teammates at an international event (EIXE 2025).
Technologies: Android (Kotlin), Java, Spring Boot, PostgreSQL, Docker. **GitHub:** [sabelaperez/GreenDots](#)
- Feb 2025 **Pickture, Winner of HackUDC 2025 — Inditex Tech Challenge**
Chrome extension that identifies clothing items in images and surfaces similar alternatives via visual search.
- Created and presented a working MVP in 36 hours with a team of three people.
- Learned new technologies in a short time frame (browser extensions, IndexedDB, Inditex Visual Search API)
Technologies: JavaScript, HTML, CSS, IndexedDB, Visual Search API. **GitHub:** [sabelaperez/Pickture](#)

Main Skills

- Languages Java, Kotlin, Spring Boot, React
Tools Docker, PostgreSQL, Git, REST APIs
Soft Skills Fast learning, problem-solving, communication, teamwork, time management

Languages

- | | | | |
|---------|---------------|----------|-------------------|
| Spanish | Native | Galician | Native |
| English | Advanced (C1) | French | Intermediate (B1) |

Other Achievements

- June 2023 Professional Music Degree, Violin specialization
August 2024 Driving License (Category B)
